Subject: Presentation Regarding Wards Advisory Committee and
Municipal Districts Governance

Prepared By: Pam Anderson, Consultant

Background Information:

On November 7, 2023, the Westminster voters set a vision and approved an advisory question to “propose by 2024 a system of electing some or all City Council members from geographic wards rather than at large”. In March, City Council introduced the redistricting process and the principles and practices to move forwards. The City Council emphasized the importance of community input in defining the governance structure and the boundaries.

The City Council passed Ordinance No. 4249, where the Council formed the Wards Advisory Committee. The committee consists of seven (7) regular members from the community appointed by each Councilor and the Mayor. The members serve in an advisory capacity to discuss and evaluate and submit recommendation(s) regarding a wards system of representation for referral to the 2024 General Election Ballot. The recommendation shall be submitted no later than July 22, 2024.

The scope of the committee’s work shall include and be limited to the following objectives:

Objective 1: the number of wards or districts; and

Objective 2: the number of Councilors per ward/district and at-large, if any, including a Mayor elected at-large.

The drawing of ward/district boundaries or maps shall not be part of the Committee’s scope of duties at this time.

A presentation will give an overview of the legal considerations, timelines, and the principles and best practices for creating electoral districts. The work session will also include a workshop to review data and facilitate discussion.

Objectives for Committee

All At-large

Ballot question advised wards plan.

Wards with at-large Mayor

Urban municipalities, or suburban/rural most common governance model. As population grows and density increases, municipalities tend to move more toward geographic representation.

Option 3 (hybrid): Wards, 2 at-large districts and Mayor

Preserves district representation as well as advantages of at-large representation.

Number of Districts & Members

Workshop will evaluate considerations & data.
