

## Community Advisory Team Meeting #2 – Executive Summary

---

WESTMINSTER BOULEVARD DRINKING WATER PROJECT

### Overview

The Westminster Boulevard Drinking Water Community Advisory Team is comprised of engaged residents and business owners who represent a diverse cross-section of the community. The team is working closely with the City of Westminster on key policy discussions related to the new drinking water facility. Group activities are limited to advising on matters that directly impact the community, including the appearance, aesthetics, and community amenities of the facility. The group shall have no legal responsibilities and is formed to give advice, recommendations and represent the overall viewpoints of the community and related stakeholders.

### Agenda

Project: **Westminster Boulevard Drinking Water Project**

Subject: Community Advisory Team meeting #2

Date: Wednesday, April 24, 2024

Time: 5-6:30 p.m.

Location: Drinking Water Facility Site

- Food
- Welcome
- Project Update
- What's Next
- Area Improvements

### Meeting Notes

#### Key Takeaways

- Community Advisory Team members shared some feedback about what their hearing from the communities about the Drinking Water Project, including questions about wildlife displacement, expected construction impacts, and trail connectivity.
- Many questions were raised and the project team is working on responses and will provide more information online soon.

- Valuable input was provided about current issues and possible improvements in the vicinity of the project area.

### Questions Asked

- Following the update presentation, several questions were brought up:
  - Is the scope of our advisory role mostly on the facility, or is it on all of those distinct projects?
  - What is gravity thickener [referenced in one of the site diagrams]?
  - What's the current level of demand and how will the three facilities work together?
  - How will phase 2 work?
  - Is the supply line existing?
  - Eagles are out there, so with construction, how will that work with nesting?
  - Let's assume that the only way you didn't save on the cost is because you didn't build the big facility you planned, and you've basically transported the costs in the facility when you have to build another facility in Phase 2.

### Map Activity

Attendees completed a map activity in two groups to note issues they would like the project team to be aware of and improvements they'd like to see in the project vicinity.
